

# Grab Handle (A-Pillar)

A-Pillar Grab Handles, from Des Gosling Mobility, provide a secure handhold to help with entry and exit from a vehicle. The rubberised handle provides a comfortable grip, and secure fixings give you the confidence to apply as much force as you need to for your transfer.

STRONG DESIGN FOR USER SAFETY

VEHICLE SPECIFIC FITTING FOR CONSISTENT QUALITY

FIXINGS DESIGNED AND MANUFACTURED IN THE UNITED KINGDOM

## COMPATIBLE WITH CURTAIN AIRBAGS

Don't let adaptations compromise your safety. These grab handles are specifically designed to ensure the curtain airbag can function as normal in the event of a collision. The flexible handle also means no hard fixings are introduced to the headroom of the vehicle.

## VEHICLE SPECIFIC FITTING KITS

Vehicle specific brackets give secure fixings which leave minimal lasting effects to your vehicle when removed.\* Kits include covers to hide necessary cuts in the trim panel.

## COMBINE WITH A TRANSFER PLATE

When using a transfer plate to help access a vehicle it can feel unstable whilst sat on this. A grab handle provides a firm hand-hold for these situations to reduce any risk of falling. A great combination of products for vehicle access!

## AVAILABLE ON THE MOTABILITY SCHEME

Available across the UK through our Installer Network for both privately owned and Motability Scheme vehicles. Get in touch with us to find a local installer.

*\*A-Pillar trim panel will be cut in order for this product to be installed.*
